How Cash Management Connects to Shifts

Cash additions, pickups, and manual cash counts belong to the selected cash drawer and its open shift. If shifts are required and no shift is open, the POS prompts you to open one first.

1. Select the physical cash drawer you are working with.
2. Confirm that drawer has the active shift.
3. Perform the cash action.
4. Review the saved entry in its history or report.

For shared drawers, coordinate with every workstation using the same drawer before counting or removing cash.
