# How to choose receipt paper size and presentation

Match the receipt layout to the printer paper used by the current register.

## Choose the paper size

1. Open **Settings > Devices & Hardware**.
2. Find **Receipt Printer**.
3. Select **80 mm**, **58 mm**, or **Letter**.
4. Save and print a test receipt.

## Browser PDF or hardware printer

On supported web devices, enable the embedded PDF receipt to use the browser’s receipt view instead of hardware-printer and automatic-print controls. Disable it when this register should send receipts directly to configured hardware.
