

How to connect a customer-facing screen

Connect a second display so customers can follow supported checkout information without viewing the employee's full register screen.

Connect the screen

1. Open **Settings > Customer-Facing Screen**.
2. Open the remote customer display on the second screen.
3. Enter the display ID or connection code shown by that screen.
4. Choose whether the customer display supports touch.
5. Choose whether detailed checkout information should be hidden.
6. Select **Save Connection**.
7. Start a test sale and confirm that the customer screen updates.

The display connection is stored for the device. Configure each register and customer screen pair separately.
