

How to enable a DYMO label printer and choose label size

Enable DYMO printing on a computer connected to a supported DYMO printer and running the required DYMO software.

Configure DYMO

1. Connect and power on the DYMO printer.
2. Confirm DYMO Connect is installed and can see the printer.
3. Open **Settings > Devices & Hardware**.
4. Enable **DYMO Printer**.
5. Select **Big**, **Small**, or **Mini** to match the installed label roll.
6. Save the settings.
7. Print a test label from the workflow that will use it.

This is a device-specific setting and must be configured on each computer that prints labels.
