How to manage event alerts or turn off text alerts

In this guide: Choose which important location events send a text message and stop alerts when they are no longer needed.

Manage event alerts

1. Open **Settings > Text Alert Settings**.
2. Review the available Event Alerts.
3. Enable or disable the events required for the selected location.
4. Save Text Alert Settings.

Available events may include

- Shift Closed
- Invoice Delete Alert
- Store Open Alert when supported by the Electron register
- Break-even (Yellow Light)
- Profit Mode (Green Light)

Turn off all text alerts

1. Open Text Alert Settings.
2. Select **Disable Text Alerts**.
3. Review the warning.
4. Confirm only when scheduled summaries and event texts should stop for that location.

Remember

Text-alert settings apply to the current location. Review each location separately when your organization operates more than one store.
