How itemized products work at the register

In this guide: Find an itemized product, add it to the cart, and confirm the quantity.

Steps

1. Open the main register.
2. Scan the UPC/barcode or enter the product name or SKU.
3. Select the matching product if a result list appears.
4. Confirm the quantity and price in the cart.
5. Change the quantity only when the product and available stock allow it.
6. Continue with the normal checkout process.

Search tips

An exact UPC/barcode or exact SKU is the fastest way to identify a product. Product-name and partial-SKU searches may show multiple results, so verify the category, price, and local stock before selecting one.
