

Receipt Notes vs Customer Notes

- **Receipt Note:** Information about this transaction. It stays with the receipt, such as a special sale explanation.
- **Customer Note:** Information connected to the customer for future visits. Save it from the Customer Note tab.
- **Reference:** An optional external or internal reference number for the transaction.

When a selected customer already has a note, a red pulsing indicator draws attention to it. Read the note before continuing. Avoid sensitive or unnecessary information; write only useful business context.
