How to lock the manual cash drawer with a PIN

Protect the manual **Open Drawer** button so employees cannot open the cash drawer without entering the configured PIN.

Enable the drawer lock

1. Open **Settings > Security** on the register device.
2. Find **Cash Drawer Access**.
3. Enable the cash-drawer lock.
4. Set a PIN when prompted.
5. Save Security settings.
6. Test the manual Open Drawer action.

After the lock is enabled, an employee using the manual Open Drawer button must enter the PIN.

The drawer PIN is a local device control. Configure and verify it on every register device that needs protection.
