How to Enable Automatic Shift Receipt Printing

1. Open **Settings → Shift**.
2. In **Automation**, enable **Auto Print Receipts**.
3. Save the settings.

When enabled, the shift receipt is printed automatically as part of the shift-close workflow, using the configured receipt printer and current shift receipt layout.

Before relying on automatic printing, confirm the device, printer connection, paper, and receipt layout. The closing record remains important even when a printer requires attention.
